## Objective

Experienced, ambitious web developer with ability to work in multiple roles. Thorough understanding of web standards with an emphasis on usability driven aesthetics. Excellent communication and customer service skills. Self-motivated in independent work and effective in a team-based setting. Pragmatic, dedicated, ability to meet deadlines and find innovative solutions to unexpected problems.

## Work Experience

### **DMM Websolutions BV** (2008 - Present)

*PHP Developer*

- Responsible for continued development and maintenance of several high-traffic vacancy sites serving tens of thousands of users per month.

### **I-Group, Inc** (2004 - 2007)

*Director of Software Development / Senior Software Developer*

- Designed and developed web application for handling insurance broker leads, communication between multiple companies, instant quoting, accounting, fulfillment, and numerous other functions across multiple enterprise level networks. Responsibilities also included all servers and application deployment.

### **Independent Contractor** (2002 - 2004)

- Developed web based accounting and reporting software for an insurance firm that generated HTML and PDF reports, spreadsheet imports and client-to-broker tracking. This system replaced a manual reporting process that lasted a work week and produced inaccurate results; the software system, in comparison, can turn out correct results in hours.
- Designed and developed a web application that parsed land ownership records into a database with custom search capabilities for targeted marketing.
- Created presentation materials explaining the plaintiff's case in a multi-million dollar personal injury lawsuit. Case was successfully settled.
- Extensive network, software services, and hardware repairs for a wide client base across central Florida area.

### **GlobalAxxess, Inc** (2000 - 2001)

*Web Developer*

- Involved in the development of an Employee Information Portal used to distribute employment information to hundreds of offsite employees.
- Maintained an extensive company website with near daily updates.

### **ptmedia** (2000-2001)

*Web Designer / Developer*

- Member of a design and development team that created numerous websites for local businesses. Design, graphics and programming all completed in-house.
- Participated in a consulting program to GlobalAxxess, Inc.
